

December 18

Let's Celebrate igrants Day

On 4 December 2000, the United Nations General Assembly adopted Resolution 55/93 proclaiming December 18 as International Migrants Day.

International Migrants Day is an opportunity for the international community to recognize the need to ensure protection for the human rights and fundamental freedoms of all migrants.

In honor of International Migrants Day, Migrants Rights International (MRI) invites all migrants' associations, migrant workers unions, support organizations, and non-governmental organizations, together with MRI's member and partner organizations, to observe this important day by carrying out public awareness raising activities such as workshops, press conferences, cultural activities, and gatherings which highlight issues faced by migrants and their families.
